

IVPC Service enhanced its experience in the training field and it provides, as a Certified Training Provider, the modules established under the GWO Global Wind Organisation standards.

### ***Standard Global Wind Organisation***

Made of a set of leading companies in the wind energy market, which brings together privates, turbine and utilities manufacturers, GWO is a non-profit organization that aims to create a safe working environment free of accidents through the identification of joint training standards about safety and emergency procedures. The international certification issued by GWO gives the opportunity to train and educate the workers belonging to the field of wind energy in compliance with the highest industry standards for safety.

### ***BST Basic Safety Training***

GWO created a Standard Package for Basic BST Technical Training designed to give attendees the knowledge of risks, in order to encourage them to adopt an appropriate behavior during all phases, and to learn the techniques to perform their tasks properly, through the appropriate use of the Personal Protection Equipment, emergency equipment and evacuation procedures.

### ***Benefits***

GWO standard stands out because all the contents of the planned training modules are specifically formulated for the wind industry, and are therefore perfectly tailored to the needs and issues related to our industrial concern.

### ***Aims***

The members of Global Wind Organisation acknowledge that the training provided and received in accordance with this standard covers the requirements for the BST (Basic Safety Training) for technicians and personnel working on the turbines.

IVPC Service, in partnership with FORM UP, provides training courses for the four modules that make up the standard BST:

- MANUAL HANDLING;
- FIRST AID;
- FIRE AWARENESS;
- WORKS AT HEIGHT

### ***Description of GWO Modules***

Manual Handling

Duration of the course: 4 hours

Validity of the course: 24 months

Fire Awareness

Duration of the course: 4 hours

Validity of the course: 24 months

First Aid

Duration of the course: 16 hours

Validity of the course: 24 months

Works at Height

Duration of the course: 16 hours

Validity of the course: 24 months
